Machine Learning in Image Steganalysis (Wiley - IEEE) By Hans Georg Schaathun

Steganography is the art of communicating a secret message, hiding the very existence of a secret message. This is typically done by hiding the message within a non-sensitive document. *Steganalysis* is the art and science of detecting such hidden messages. The task in steganalysis is to take an object (communication) and classify it as either a steganogram or a clean document. Most recent solutions apply classification algorithms from machine learning and pattern recognition, which tackle problems too complex for analytical solution by teaching computers to learn from empirical data.

Part 1 of the book is an introduction to steganalysis as part of the wider trend of multimedia forensics, as well as a practical tutorial on machine learning in this context. **Part 2** is a survey of a wide range of feature vectors proposed for steganalysis with performance tests and comparisons. **Part 3** is an in-depth study of machine learning techniques and classifier algorithms, and presents a critical assessment of the experimental methodology and applications in steganalysis.

Key features:

- Serves as a tutorial on the topic of steganalysis with brief introductions to much of the basic theory provided, and also presents a survey of the latest research.
- Develops and formalises the application of machine learning in steganalysis; with much of the understanding of machine learning to be gained from this book adaptable for future study of machine learning in other applications.
- Contains Python programs and algorithms to allow the reader to modify and reproduce outcomes discussed in the book.
- Includes companion software available from the author's website.

Machine Learning in Image Steganalysis (Wiley - IEEE) By Hans Georg Schaathun Bibliography

- Rank: #5462332 in Books
- Brand: Brand: Wiley-IEEE Press
- Published on: 2012-10-04
- Original language: English
- Number of items: 1
- Dimensions: 9.90" h x .70" w x 6.80" l, 1.27 pounds
- Binding: Hardcover
- 296 pages

Editorial Review

Users Review

From reader reviews:

Shanika Jeans:

Reading a e-book tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can share their idea. Guides can also inspire a lot of people. Plenty of author can inspire their reader with their story or maybe their experience. Not only the story that share in the textbooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors in this world always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this Machine Learning in Image Steganalysis (Wiley - IEEE).

Brian Kelley:

As we know that book is vital thing to add our knowledge for everything. By a reserve we can know everything we really wish for. A book is a set of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This book Machine Learning in Image Steganalysis (Wiley - IEEE) was filled regarding science. Spend your free time to add your knowledge about your science competence. Some people has distinct feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a reserve. In the modern era like today, many ways to get book that you simply wanted.

Maurice Neely:

What is your hobby? Have you heard which question when you got pupils? We believe that that question was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person like reading or as reading through become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You will find good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is Machine Learning in Image Steganalysis (Wiley - IEEE).

David Conover:

A lot of people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose the particular book Machine Learning in Image Steganalysis (Wiley - IEEE) to make your reading is interesting. Your own skill of reading skill is developing when you

including reading. Try to choose basic book to make you enjoy to read it and mingle the idea about book and looking at especially. It is to be initial opinion for you to like to open up a book and learn it. Beside that the book Machine Learning in Image Steganalysis (Wiley - IEEE) can to be your brand-new friend when you're feel alone and confuse with the information must you're doing of the time.
