Triple-Helical Nucleic Acids By Valery N. Soyfer, Vladimir N. Potaman

The ability of DNA to exist in configurations other than its classical double-stranded form has been known for many years. There has been a spectacular recent surge of interest in these forms, notably in the three-stranded or triple-helical form. Triplex-like nucleic acids are now known to exist *in vivo*, and may well participate in significant biological processes. Interest in triple-helical nucleic acids has been greatly stimulated by their potential exploitation to control gene expression, serve as tools in genome mapping strategies, etc. The authors have written an encyclopedic introduction to nucleic acid triplexes based on many years of familiarity with the topic. The book includes information on chemistry, conformation, physical properties, applications, and hypotheses about the biological role of triplexes. It pays particular attention to the different methods for investigating these molecules, a feature which will be welcomed by those new to the field.

Editorial Review

Review

"A thriving new area of research in nucleic acids focuses on triple helical structures in DNA. The authors review what we know about most aspects of these novel structures, covering structural, molecular recognition and physico-chemical aspects in detail. Read the book to learn the structural aspects of triplexes..." Nature

From reader reviews:

Sandra Phillips:

In this 21st centuries, people become competitive in most way. By being competitive today, people have do something to make them survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated this for a while is reading. Yep, by reading a guide your ability to survive improve then having chance to remain than other is high. In your case who want to start reading any book, we give you this kind of Triple-Helical Nucleic Acids book as nice and daily reading e-book. Why, because this book is usually more than just a book.

Claudia Chittum:

Now a day people that Living in the era everywhere everything reachable by connect to the internet and the resources within it can be true or not call for people to be aware of each facts they get. How a lot more to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Reading a book can help people out of this uncertainty Information specially this Triple-Helical Nucleic Acids book because this book offers you rich facts and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it everbody knows.

Pam Boyd:

In this age globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The health of the world makes the information better to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is Triple-Helical Nucleic Acids this e-book consist a lot of the information from the condition of this world now. This specific book was represented how can the world has grown up. The terminology styles that writer require to explain it is easy to understand. The particular writer made some investigation when he makes this book. That is why this book ideal all of you.

Aida Zambrana:

Do you like reading a guide? Confuse to looking for your selected book? Or your book has been rare? Why so many query for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes examining, not only science book but novel and Triple-Helical Nucleic Acids or even others sources were given understanding for you. After you know how the good a book, you feel would like to read more and more. Science guide was created for teacher as well as students especially. Those books are helping them to include their knowledge. In some other case, beside science reserve, any other book likes Triple-Helical Nucleic Acids to make your spare time far more colorful. Many types of book like this.
