FREEDOM: The End of the Human Condition By Jeremy Griffith Harry Prosen

FREEDOM has its own very informative website, visit humancondition.com

The fastest growing realization everywhere is that humanity can't go on the way it is going. Indeed, the great fear is we're entering endgame where we appear to have lost the race between self-destruction and self-discovery?the race to find the psychologically relieving understanding of our 'good and evil'-afflicted human condition. **Well, astonishing as it is, this book by biologist Jeremy Griffith presents the 11th hour breakthrough biological explanation of the human condition necessary for the psychological rehabilitation and transformation of our species!**

The culmination of 40 years of studying and writing about our species' psychosis, **FREEDOM** delivers nothing less than the holy grail of insight we have needed to free ourselves from the human condition. It is, in short, as Professor Harry Prosen, a former president of the Canadian Psychiatric Association, asserts in his Introduction, **'The book that saves the world'**.

Griffith has been able to venture right to the bottom of the dark depths of what it is to be human and return with the fully accountable, true explanation of our seemingly imperfect lives. At long last we have the redeeming and thus transforming understanding of human behaviour! And with that explanation found all the other great outstanding scientific mysteries about our existence are now also able to be truthfully explained?of the meaning of our existence, of the origin of our unconditionally selfless moral instincts, and of why we humans became conscious when other animals haven't. Yes, the full story of life on Earth can finally be told?and all of these incredible breakthroughs and insights are presented here in this 'greatest of all books'.

PLEASE NOTE that a very short and powerful condensation of *FREEDOM* titled *Transform Your Life and Save The World* is now available for free at humancondition.com or for purchase on **Amazon**. Since *FREEDOM* is quite a long book (which it has to be for it to be the definitive explanation and resolution of the human condition), you may find this short book very helpful.

Editorial Review

Review

'What this book of books, in fact this *greatest of all books*, does is take humanity from a state of bewilderment about the nature of human behavior and existence to a state of profound understanding of our lives--understanding that drains away all the pain, suffering, confusion and conflict from the world. This is it -- THE BOOK THAT SAVES THE WORLD!' - **Professor Harry Prosen**, *former President of the Canadian Psychiatric Association*

'Nothing Dr. Prosen has said about the immense importance of this book is an exaggeration. This *is* the book all humans need to read for our collective wellbeing.' - **Dr Scott D. Churchill**, *Professor and former Chair, Psychology Department, University of Dallas*

"I've never felt the world more threatening, more fractious, more fissiparous, more febrile... We need to think, we need new ideas, we need proselytizers, we need obsessed people, which I think Jeremy is. We need him to be questioned. We need 'FREEDOM' to be argued, we need it to be read and talked about and understood. It may be right, it may be wrong. But you need someone as committed as Jeremy to trying to understand what gets us here... Jeremy made me think afresh and think differently. I hope he does it with you." - **Sir Bob Geldof**, *humanitarian and musician*

'This book is actually written from a position *outside* of the human condition. *It is just amazing*; Griffith walks freely through all the psychosis of our troubled human condition and with such freedom is able to explain everything about us!' - **Tim Macartney-Snape**, *biologist, mountaineer and twice-honoured Order of Australia recipient*

'You never forget the moment when you realise this really does explain the human condition.' - **Brian Carlton**, *journalist, commentator and broadcaster*

'The sequence of discussion in 'FREEDOM' is so logical and sensible, providing the necessary breakthrough in the critical issue of needing to understand ourselves.' - **Dr David Chivers**, *anthropologist and former President of the Primate Society of Great Britain*

'How could we be good when all the evidence seems to unequivocally indicate that we are a deeply flawed, bad, even evil species?' Clearly, it's not an easy question to answer, and the author succeeds in not treating the subject lightly. He includes a plethora of material for readers to absorb, including poetry, song lyrics, information on bonobos ("humans' closest relatives"), and thoughts from thinkers from Plato to Søren Kierkegaard to E.O. Wilson... an undeniably intriguing, well-organized investigation.' - **Kirkus Reviews**

"Impressively well written, persuasively argued, deftly organized and accessibly presented, "Freedom: The End of the Human Condition" is a compelling and articulate read throughout. Highly recommended for both community and academic library collections, "Freedom: The End of the Human Condition" will prove to be of compelling interest to both academia and the non-specialist general reader." - **Midwest Book Review**

About the Author

Jeremy Griffith spent six years in the wilds of Tasmania where he undertook the most thorough investigation ever into the plight of the Tasmanian Tiger, concluding that it was extinct. During this time, aged 27, Jeremy shifted his exploratory focus to humanity, which has remained his life's preoccupation for the last 40 years. He started writing about the human condition in 1975, established the World Transformation Movement in 1983 (originally established as the Foundation for Humanity's Adulthood), published his first book, *Free: The End of the Human Condition* in 1988, his second book, *Beyond the Human Condition* in 1991, and his bestselling third book, *A Species In Denial*, in 2004.

--

Harry Prosen is a professor of psychiatry who has worked in the field for over 50 years, including chairing two departments of psychiatry and serving as president of the Canadian Psychiatric Association. Professor Prosen was recently appointed one of 500 Specially Selected Fellows of the American College of Psychiatrists, and a Distinguished Life Member of the American Psychiatric Association. He is also psychiatric consultant to the Bonobo Species Preservation Society.

Users Review
