Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) From Springer

This handbook brings together recent advances in the areas of supply chain optimization, supply chain management, and life-cycle cost analysis of bioenergy. These topics are important for the development and long-term sustainability of the bioenergy industry.

The increasing interest in bioenergy has been motivated by its potential to become a key future energy source. The opportunities and challenges that this industry has been facing have been the motivation for a number of optimization-related works on bioenergy.

Practitioners and academicians agree that the two major barriers of further investments in this industry are biomass supply uncertainty and costs. The goal of this handbook is to present several cutting-edge developments and tools to help the industry overcome these supply chain and economic challenges.

Case studies highlighting the problems faced by investors in the US and Europe illustrate the impact of certain tools in making bioenergy an economically viable energy option.

Editorial Review

Review

“This book, edited by Eksioglu (Clemson Univ.), Rebennack (Colorado School of Mines), and Pardalos (Univ. of Florida), focuses on new developments in and tools for bioenergy supply chain management. ... The numerous end-of-chapter references provide a good review of the literature in this important field. Summing Up: Recommended. Upper-division undergraduates through professionals/practitioners.” (L. E. Erickson, Choice, Vol. 53 (6), February, 2016)

From the Back Cover

This handbook brings together recent advances in the areas of supply chain optimization, supply chain management, and life-cycle cost analysis of bioenergy. These topics are important for the development and long-term sustainability of the bioenergy industry.

The increasing interest in bioenergy has been motivated by its potential to become a key future energy source. The opportunities and challenges that this industry has been facing have been the motivation for a number of optimization-related works on bioenergy.

Practitioners and academicians agree that the two major barriers of further investments in this industry are biomass supply uncertainty and costs. The goal of this handbook is to present several cutting-edge developments and tools to help the industry overcome these supply chain and economic challenges.

Case studies highlighting the problems faced by investors in the US and Europe illustrate the impact of certain tools in making bioenergy an economically viable energy option.

About the Author

Dr. Sandra D. Eksioglu is an Associate Professor of Industrial Engineering at Clemson University. She received her PhD in Industrial Engineering from the University of Florida. Dr. Eksioglu's expertise is in the areas of operations research, network optimization, and algorithmic development. She uses these tools to develop models and solution algorithms for solving large-scale problems that arise in the areas of transportation, logistics, and supply chain. In particular, she is interested in the application of these tools to the bioenergy supply chain. In 2011, she received the NSF CAREER Award for her work on biomass-for-biofuel supply chain design and management. She is an active member of INFORMS, IIE and ASEE.

Dr. Steffen Rebennack is an Assistant Professor at the Colorado School of Mines, USA. He obtained his PhD at the University of Florida. His research interests are in dimension-reduction techniques for large-scale optimization problems, particularly with applications in power systems, stochastic optimization and global optimization. For his dissertation work, he has received the GOR Dissertation Award 2011 and an Honorable Mention at the 2010 George B. Dantzig Dissertation Award.

Panos M. Pardalos serves as Distinguished Professor of Industrial and Systems Engineering at the University of Florida. Additionally, he is the Paul and Heidi Brown Preeminent Professor in Industrial & Systems

Engineering. He is also an affiliated faculty member of the Computer and Information Science Department, the Hellenic Studies Center, and the Biomedical Engineering Department. He is also the Director of the Center for Applied Optimization. Dr. Pardalos is a world leading expert in global and combinatorial optimization. His recent research interests include energy, network design problems, optimization in telecommunications, e-commerce, data mining, biomedical applications, and massive computing. Dr. Pardalos is the Editor in Chief of Energy

Systems (Springer), Fellow of AAAS and INFORMS, and member of several Academies of Sciences. In 2013 he was awarded the Constantin Carathéodory Prize, and the EURO Gold Medal

Users Review

From reader reviews:

George Sanders:

This Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) are reliable for you who want to be a successful person, why. The main reason of this Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) can be on the list of great books you must have will be giving you more than just simple examining food but feed you actually with information that possibly will shock your prior knowledge. This book is definitely handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed people. Beside that this Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) forcing you to have an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day exercise. So , let's have it appreciate reading.

Myrtle Anderson:

Reading a e-book can be one of a lot of exercise that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new facts. When you read a publication you will get new information mainly because book is one of a number of ways to share the information as well as their idea. Second, examining a book will make an individual more imaginative. When you reading a book especially tale fantasy book the author will bring someone to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems), you may tells your family, friends as well as soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a e-book.

Joshua Smith:

The guide untitled Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) is the e-book that recommended to you to study. You can see the quality of the e-book content that will be shown to anyone. The language that author use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, to ensure the information that they share to you personally is absolutely accurate. You also will get the e-book of Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems) from the publisher to make you more enjoy free time.

Johnnie Gonzales:

Playing with family in a park, coming to see the water world or hanging out with buddies is thing that usually you may have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Handbook of Bioenergy: Bioenergy Supply Chain - Models and Applications (Energy Systems), you are able to enjoy both. It is good combination right, you still desire to miss it? What kind of hangout type is it? Oh occur its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.
