Information Systems Project Management By AVISON

There are a number of books out there on project management. What is different and specific about this book? - There is a balance between sociocultural and technical aspects, and there is a balance between qualitative and quantitative aspects??project management is seen as both an art and a science. - It provides an information systems orientation for project management: information technology is not oriented on one side, with production and operations oriented on the other, Instead, both are applied within an organizational-wide view. - It stresses information systems as a whole, not just software development??no project is successful if only software aspects are considered. - It gives a truly international view of the domain??examples and experiences from different parts of the world add richness as well as context to the material. - Globalization has ensured that most projects take on an international dimension. - The book provides a coherent explanation of the concerns of the project manager as the project develops through its life cycle??the book does not follow a ??kitchen sink approach??. - Each chapter has the following consistent structure: an introduction and outline, an exhibit, the main text with examples, a chapter summary, exercises, discussion questions, an interview with a project manager, and an appendix??this structure provides coherence and consistency. The material in this text has proven successful through repeated use in courses in the United States, Europe, and Australia by practitioners as well as undergraduate and postgraduate students. Intended Audience This core text is designed for advanced undergraduate and graduate courses such as Management Information Systems, Computer Information Systems, Information Systems, and Decision and Information Systems in departments of information systems, information technology, and business.

Editorial Review

Users Review

From reader reviews:

Richard Williams:

The book Information Systems Project Management can give more knowledge and information about everything you want. So why must we leave the great thing like a book Information Systems Project Management? A number of you have a different opinion about guide. But one aim that book can give many data for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or info that you take for that, you can give for each other; you could share all of these. Book Information Systems Project Management has simple shape however, you know: it has great and large function for you. You can appear the enormous world by open and read a guide. So it is very wonderful.

Elvia Ecklund:

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, and then why you don't try factor that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Information Systems Project Management, it is possible to enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh seriously its mind hangout fellas. What? Still don't get it, oh come on its called reading friends.

Linda Harris:

Do you have something that you enjoy such as book? The book lovers usually prefer to select book like comic, small story and the biggest an example may be novel. Now, why not attempting Information Systems Project Management that give your entertainment preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the method for people to know world much better then how they react toward the world. It can't be mentioned constantly that reading habit only for the geeky man but for all of you who wants to always be success person. So , for every you who want to start looking at as your good habit, you may pick Information Systems Project Management become your own starter.

Jan Dixon:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's internal or real their hobby. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring

along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Information Systems Project Management can make you feel more interested to read.
