# Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data

By Tony Ojeda, Sean Patrick Murphy, Benjamin Bengfort, Abhijit Dasgupta

Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data By Tony Ojeda, Sean Patrick Murphy, Benjamin Bengfort, Abhijit Dasgupta

Key Features

- Learn how to tackle every step in the data science pipeline and use it to acquire, clean, analyze, and visualize data
- Get beyond the theory with real-world projects
- Expand your numerical programming skills through step-by-step code examples and learn more about the robust features of R and Python

Book Description

Data's value has grown exponentially in the past decade, with 'Big Data' today being one of the biggest buzzwords in business and IT, and data scientist hailed as 'the sexiest job of the 21st century'. Practical Data Science Cookbook helps you see beyond the hype and get past the theory by providing you with a hands-on exploration of data science. With a comprehensive range of recipes designed to help you learn fundamental data science tasks, you'll uncover practical steps to help you produce powerful insights into Big Data using R and Python.

Use this valuable data science book to discover tricks and techniques to get to grips with your data. Learn effective data visualization with an automobile fuel efficiency data project, analyze football statistics, learn how to create data simulations, and get to grips with stock market data to learn data modelling. Find out how to produce sharp insights into social media data by following data science tutorials that demonstrate the best ways to tackle Twitter data, and uncover recipes that will help you dive in and explore Big Data through movie recommendation databases.

Practical Data Science Cookbook is your essential companion to the real-world challenges of working with data, created to give you a deeper insight into a world of Big Data that promises to keep growing.

What you will learn

- Follow the recipes in this essential data science cookbook to learn the fundamentals of data science and data analysis
- Put theory into practice with a selection of real-world Big Data projects
- Learn the data science pipeline and successfully structure your data science project
- Find out how to clean, munge, and manipulate data
- Learn different approaches to data modelling and how to determine the most appropriate for your data
- Learn numerical computing with NumPy and SciPy

About the Authors

Tony Ojeda is the founder of District Data Labs, a cofounder of Data Community DC, and is actively involved in promoting data science education through both organizations.

Sean Patrick Murphy spent 15 years as a senior scientist at The Johns Hopkins University Applied Physics Laboratory, where he focused on machine learning, modeling and simulation, signal processing, and high performance computing in the Cloud. Now, he acts as an advisor and data consultant for companies in SF, NY, and DC.

Benjamin Bengfort has worked in military, industry, and academia for the past 8 years. He is currently pursuing his PhD in Computer Science at the University of Maryland, College Park, researching Metacognition and Natural Language Processing.

Abhijit Dasgupta is a data consultant working in the greater DC-Maryland-Virginia area, with several years of experience in biomedical consulting, business analytics, bioinformatics, and bioengineering consulting.

Table of Contents

1. Preparing Your Data Science Environment
2. Driving Visual Analysis with Automobile Data (R)
3. Simulating American Football Data (R)
4. Modeling Stock Market Data (R)
5. Visually Exploring Employment Data (R)
6. Creating Application-oriented Analyses Using Tax Data (Python)
7. Driving Visual Analyses with Automobile Data (Python)
8. Working with Social Graphs (Python)
9. Recommending Movies at Scale (Python)
10. Harvesting and Geolocating Twitter Data (Python)
11. Optimizing Numerical Code w

Editorial Review

About the Author

Tony Ojeda

Tony Ojeda is an accomplished data scientist and entrepreneur, with expertise in business process optimization and over a decade of experience creating and implementing innovative data products and solutions. He has a Master's degree in Finance from Florida International University and an MBA with concentrations in Strategy and Entrepreneurship from DePaul University. He is the founder of District Data Labs, a cofounder of Data Community DC, and is actively involved in promoting data science education through both organizations.

Sean Patrick Murphy

Sean Patrick Murphy spent 15 years as a senior scientist at The Johns Hopkins University Applied Physics Laboratory, where he focused on machine learning, modeling and simulation, signal processing, and high performance computing in the Cloud. Now, he acts as an advisor and data consultant for companies in SF, NY, and DC. He completed his graduation from The Johns Hopkins University and his MBA from the University of Oxford. He currently co-organizes the Data Innovation DC meetup and cofounded the Data Science MD meetup. He is also a board member and cofounder of Data Community DC.

Benjamin Bengfort

Benjamin Bengfort is an experienced data scientist and Python developer who has worked in military, industry, and academia for the past 8 years. He is currently pursuing his PhD in Computer Science at the University of Maryland, College Park, doing research in Metacognition and Natural Language Processing. He holds a Master's degree in Computer Science from North Dakota State University, where he taught undergraduate Computer Science courses. He is also an adjunct faculty member at Georgetown University, where he teaches Data Science and Analytics. Benjamin has been involved in two data science start-ups in the DC region: leveraging large-scale machine learning and Big Data techniques across a variety of applications. He has a deep appreciation for the combination of models and data for entrepreneurial effect, and he is currently building one of these start-ups into a more mature organization.

Abhijit Dasgupta

Abhijit Dasgupta is a data consultant working in the greater DC-Maryland-Virginia area, with several years

of experience in biomedical consulting, business analytics, bioinformatics, and bioengineering consulting. He has a PhD in Biostatistics from the University of Washington and over 40 collaborative peer-reviewed manuscripts, with strong interests in bridging the statistics/machine-learning divide. He is always on the lookout for interesting and challenging projects, and is an enthusiastic speaker and discussant on new and better ways to look at and analyze data. He is a member of Data Community DC and a founding member and co-organizer of Statistical Programming DC (formerly, R Users DC).

Users Review

From reader reviews:

Gabriel Reed:

The book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data make you feel enjoy for your spare time. You can use to make your capable far more increase. Book can for being your best friend when you getting tension or having big problem together with your subject. If you can make studying a book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data to get your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like available and read a e-book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data. Kinds of book are several. It means that, science publication or encyclopedia or other people. So , how do you think about this reserve?

Jerry Goble:

The book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data can give more knowledge and also the precise product information about everything you want. Why then must we leave the best thing like a book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data? Several of you have a different opinion about publication. But one aim that will book can give many details for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or data that you take for that, you may give for each other; you may share all of these. Book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data has simple shape nevertheless, you know: it has great and massive function for you. You can look the enormous world by available and read a reserve. So it is very wonderful.

Marcia Marshall:

This Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is definitely information inside this e-book incredible fresh, you will get information which is getting deeper you actually read a lot of information you will get. That Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data without we know teach the one who studying it become critical in contemplating and analyzing. Don't always be worry Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data can bring whenever you are and not make your tote space or bookshelves' come to be full

because you can have it in your lovely laptop even cellphone. This Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data having great arrangement in word along with layout, so you will not experience uninterested in reading.

Irish Watts:

Many people said that they feel bored when they reading a guide. They are directly felt it when they get a half portions of the book. You can choose the particular book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data to make your current reading is interesting. Your personal skill of reading skill is developing when you such as reading. Try to choose straightforward book to make you enjoy to learn it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to open up a book and examine it. Beside that the book Practical Data Science Cookbook - Real-World Data Science Projects to Help You Get Your Hands On Your Data can to be your brand-new friend when you're sense alone and confuse using what must you're doing of the time.
