## How We Think: Digital Media and Contemporary Technogenesis By N. Katherine Hayles

“How *do* we think?” N. Katherine Hayles poses this question at the beginning of this bracing exploration of the idea that we think through, with, and alongside media. As the age of print passes and new technologies appear every day, this proposition has become far more complicated, particularly for the traditionally print-based disciplines in the humanities and qualitative social sciences. With a rift growing between digital scholarship and its print-based counterpart, Hayles argues for contemporary technogenesis—the belief that humans and technics are coevolving—and advocates for what she calls comparative media studies, a new approach to locating digital work within print traditions and vice versa.

Hayles examines the evolution of the field from the traditional humanities and how the digital humanities are changing academic scholarship, research, teaching, and publication. She goes on to depict the neurological consequences of working in digital media, where skimming and scanning, or “hyper reading,” and analysis through machine algorithms are forms of reading as valid as close reading once was. Hayles contends that we must recognize all three types of reading and understand the limitations and possibilities of each. In addition to illustrating what a comparative media perspective entails, Hayles explores the technogenesis spiral in its full complexity. She considers the effects of early databases such as telegraph code books and confronts our changing perceptions of time and space in the digital age, illustrating this through three innovative digital productions—Steve Tomasula’s electronic novel, *TOC*; Steven Hall’s *The Raw Shark Texts*; and Mark Z. Danielewski’s *Only Revolutions*.

Deepening our understanding of the extraordinary transformative powers digital technologies have placed in the hands of humanists, *How We Think* presents a cogent rationale for tackling the challenges facing the humanities today.

### Editorial Review

#### Review

“*How We Think* offers a comprehensive account of how humanities scholars and students apprehend their work differently in the context of the digital turn. The perfect fusion of N. Katherine Hayles’s characteristically lucid technical explanations and virtuosic literary analyses, this book navigates the divide between the traditional and digital humanities and shows us how they might in fact intellectually stimulate and support each other. A discipline supposedly in crisis has never seemed so vibrant.”—Rita Raley, University of California, Santa Barbara

(*Rita Raley*)

“Compelling, brilliant, remarkable for its breadth and its insightful mapping of the digital humanities. A must read for all humanities scholars wanting to move beyond the hype and hysteria surrounding digital media.”—Wendy Hui Kyong Chun, Brown University

(*Wendy Chun*)

“If you are presently teaching or practicing digital, or a traditional academic in denial, or just curious about the impact of digital technology in the humanities, *How We Think* has arrived at the right time.”

(*New York Journal of Books*)

“By making use of the humanist and scientist vocabularies, the book represents a new model of humanist writing, one that is avowedly concerned with the material aspects of epistemological practices.”

(*Invisible Culture*)

“*How We Think* disrupts the popular notion that there is a technological split between generations or between fields of study. . . . Hayles thoroughly supports her argument for technogenesis, providing concrete examples of the coevolution of humans and technics. She also explores the nuanced construction of temporality, spatiality, narrative, and database that occurs at the interface between human and technological beings. Whether or not we are prepared to welcome this intersection into our lives and work, it is already present and inextricable.”

(*Kairos*)

#### About the Author

**N. Katherine Hayles** is professor of literature at Duke University. Her books include *How We Became Posthuman: Virtual Bodies in Cybernetics, Literature, and Informatics* and *Writing Machines*.

### Users Review

#### From reader reviews:

**Diana Brunswick:**

This *How We Think: Digital Media and Contemporary Technogenesis* book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is actually information inside this publication incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. This specific *How We Think: Digital Media and Contemporary Technogenesis* without we comprehend teach the one who studying it become critical in contemplating and analyzing. Don't become worry *How We Think: Digital Media and Contemporary Technogenesis* can bring any time you are and not make your case space or bookshelves' turn into full because you can have it in the lovely laptop even telephone.
