## Integral/Structural Polymer Foams: Technology, Properties and Applications By Fyodor A. Shutov

Integral, or structural, foams are one of the most remarkable materials that have been developed over the last fifteen years. As with all rapidly growing fields, the terminology seems to have grown even faster. Thus there are two names for the material structure itself. In the United States and in Japan the term for these plastics is Structural Foams, whereas in Europe and the USSR the term used is usually Integral Foams. We have adhered to the European term in the text and hope our colleagues will bear with us. Integral foams have a specific structure: a cellular core that gradually turns into a solid skin. The skin gives the part its form and stiffness, while the cellular core contributes to the very high strength-to-weight values of the material. These are higher than those of some unfoamed plastics and metals. The sandwich-like structure with its unique mechanical properties was prompted by nature. Wood and bone are strong and light-weight natural materials having a cellular structure. Since the sandwich-like structure of the integral foams resembles that of natural wood, the foams are often referred to as artificial wood or plastic wood, thereby emphasizing not only the formal structural similarity of these materials, but also one of the main functional applications of integral foams - replacement of wooden articles in various fields of engineering and construction.

### **Editorial Review**

#### **Users Review**

##### **From reader reviews:**

##### **Victor Kohlmeier:**

The reserve with title Integral/Structural Polymer Foams: Technology, Properties and Applications has lot of information that you can study it. You can get a lot of benefit after read this book. This book exist new understanding the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you in new era of the glowbal growth. You can read the e-book with your smart phone, so you can read that anywhere you want.

##### **Mary Manzo:**

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity that's look different you can read any book. It is really fun for yourself. If you enjoy the book that you simply read you can spent the whole day to reading a publication. The book Integral/Structural Polymer Foams: Technology, Properties and Applications it is rather good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. If you did not have enough space to deliver this book you can buy often the e-book. You can m0ore easily to read this book through your smart phone. The price is not to cover but this book possesses high quality.

##### **Rosemary Perez:**

Reading can called mind hangout, why? Because while you are reading a book mainly book entitled Integral/Structural Polymer Foams: Technology, Properties and Applications your brain will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will end up your mind friends. Imaging every word written in a publication then become one type conclusion and explanation that will maybe you never get previous to. The Integral/Structural Polymer Foams: Technology, Properties and Applications giving you one more experience more than blown away your head but also giving you useful data for your better life in this particular era. So now let us explain to you the relaxing pattern here is your body and mind will likely be pleased when you are finished studying it, like winning a. Do you want to try this extraordinary shelling out spare time activity?

**Christina Bishop:**

Are you kind of active person, only have 10 or maybe 15 minute in your day time to upgrading your mind ability or thinking skill even analytical thinking? Then you are having problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find book that need more time to be study. Integral/Structural Polymer Foams: Technology, Properties and Applications can be your answer since it can be read by you who have those short extra time problems.
