**Nuclear Energy Leadership: Lessons Learned from US Operators** By Mary Jo Rogers PhD

The nuclear industry has quietly evolved over the past 30 years to become one of the safest and most reliable low-cost producers of electricity.

Mary Jo Rogers's new book, *Nuclear Energy Leadership: Lessons Learned from US Operators*, provides helpful suggestions as well as useful tools drawn from the best of the nuclear industry. This timely book illustrates with convincing detail and relevant case studies how the lessons from the best nuclear operators can be applied to nonnuclear operations-based organizations to markedly improve production and safety performance. The author draws from a research database on nuclear leaders, supervisors, senior leadership teams and organizations, interviews with numerous nuclear leaders, as well as extensive personal experience assisting in nuclear power plant turnarounds.

With increased pressure on cost of production for fossil generation and oil and gas, readers from the energy and utility industries would greatly benefit from the lessons learned by excellent nuclear operators.

### Editorial Review

#### Review

Dr. Rogers provides leadership secrets for success from some of the industry's best leaders. She challenges leaders of other high reliability organizations such as hospitals, refineries, chemical plants and oil drilling operations to embrace some of the methods that have made American nuclear power the safe, reliable operation that it is today.

Superb work full of ideas and philosophies of operation that if adhered to, will make any HRO a success. I recommend this book to all who seek to know the American nuclear industry from the uninitiated to the industry's senior leaders.

Jack Davis

I am truly impressed! An excellent job conveying why and how the industry has improved. I found it to be an easy read, maybe because it is so familiar. A great job providing how it could be used in other industries. I met with the Natural Gas Association and discussed why INPO works and what portions could work in the Gas industry. If I was a non nuclear type and read the book I would definitely be interested in seeing what I could use.

Congratulations again and take time to reflect on what a good job you have done in writing the book.

Joe Pollock

Entergy Vice President Operations

Really well done; an excellent text on the leadership culture of our industry. Being a former nuclear naval officer, I also appreciate your acknowledgement of the positive effects of Admiral Rickover and the nuclear navy on civilian nuclear power.

I will be recommending the book to my Canadian friends at SNC Lavalin Nuclear... as we have an interest in expanding our support of US nuclear generation. You have developed an outstanding book of need-to-know information in understanding US nuclear management priorities.

Dave Kaskie
