**The Human Nervous System, Second Edition** By George Paxinos, Juergen K. Mai

This long-awaited update of the classic, **The Human Nervous System**, stands as an impressive survey of our knowledge of the brain, spinal cord, and peripheral nervous system. The book has been completely redone and brought up-to-date. An impressive and respected cast of international authors have contributed 37 chapters on topics ranging from Brain Evolution, all phases of Brain Development, to all areas of the adult brain and peripheral pathways, along with careful descriptions of the spinal cord and peripheral nervous system, brainstem and cerebellum. **The Human Nervous System, Second Edition** will again serve as the gold standard, providing a one-stop source of up-to-date information about our knowledge of the human nervous system.

This second edition of the standard reference on the human nervous system is extensively and completely revised and updated from the 1990 first edition. Written by the leading researchers, many chapters have been completely rewritten, new chapters have been added. A new section on Evolution and Development provides a broader perspective, and all chapters include references and perspectives to neurological disease.

## **Editorial Review**

### About the Author

Professor George Paxinos, AO (BA, MA, PhD, DSc) completed his BA at The University of California at Berkeley, his PhD at McGill University, and spent a postdoctoral year at Yale University. He is the author of almost 50 books on the structure of the brain of humans and experimental animals, including *The Rat Brain in Stereotaxic Coordinates*, now in its 7th Edition, which is ranked by Thomson ISI as one of the 50 most cited items in the Web of Science. Dr. Paxinos paved the way for future neuroscience research by being the first to produce a three-dimensional (stereotaxic) framework for placement of electrodes and injections in the brain of experimental animals, which is now used as an international standard. He was a member of the first International Consortium for Brain Mapping, a UCLA based consortium that received the top ranking and was funded by the NIMH led Human Brain Project. Dr. Paxinos has been honored with more than nine distinguished awards throughout his years of research, including: The Warner Brown Memorial Prize (University of California at Berkeley, 1968), The Walter Burfitt Prize (1992), The Award for Excellence in Publishing in Medical Science (Assoc Amer Publishers, 1999), The Ramaciotti Medal for Excellence in Biomedical Research (2001), The Alexander von Humboldt Foundation Prize (Germany 2004), and more.

Jürgen Konrad Mai studied medicine in Freiburg, Germany, Vienna and UT Southwestern Medical School, Dallas, U.S.A. Student and Medical practices in Freiburg (Clinic for Neurosurgery), Berlin and Düsseldorf. Dissertation ("summa cum laude") and habilitation were awarded by the University of Düsseldorf: After a period as GP in private practice (Titisee-Neustadt) he became scientific assistant and senior assistant at the C. and O. Vogt-Institute for Brain Research, University of Düsseldorf (1972 - 1983) and 1983 Professor of Neuroanatomy at the Institute of Neuroanatomy, H.-Heine-University of Düsseldorf. He served as director of the Department of the Institute of Anatomy 1 until retirement in 2011.

The main research interests are (i) the structural and molecular anatomy of the mammalian brain, especially of the human brain and (ii) expression patterns and regulation of terminal carbohydrates in development, cell activation and disease (III) operation planning in stereotactic neurosurgery. He works on a "Digital Brain Atlas for Planning and Interindividual Registration of Targets in Deep Brain Stimulation" and on a "Spatial Information Management Resource for the Human Brain". J. K. Mai has edited the catalogue of human brain sections from the Vogt collection; he is author and editor of several books, e.g. the awarded "Atlas of the Human Brain" with CD-ROM (Academic Press/Elsevier, San Diego), "The Human Nervous System" (Academic Press/Elsevier, San Diego, Amsterdam, 3rd ed. 2012), *Funktionelle Anatomie für Zahnmediziner* (Quintessenz, Berlin, 2nd. ed. 2008; Sensi Divini (ital., engl., ger, russ. eds). J. K. Mai is CEO of MR-X-Brain GmbH.

Excerpt. © Reprinted by permission. All rights reserved.

Presents detailed illustration of structural and architectonic studies of the human brain along with a comprehensive survey of information on the brain, spinal cord, and peripheral nervous system.

## **Users Review**

### **From reader reviews:**

**Sean Bass:**

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a go walking, shopping, or went to typically the Mall. How about open or perhaps read a book entitled The Human Nervous System, Second Edition? Maybe it is to get best activity for you. You understand beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have different opinion?

**Ruby Mejia:**

Information is provisions for anyone to get better life, information today can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is inside former life are difficult to be find than now is taking seriously which one works to believe or which one the resource are convinced. If you find the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take The Human Nervous System, Second Edition as your daily resource information.

**Pedro Dillon:**

Are you kind of stressful person, only have 10 or 15 minute in your day time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are having problem with the book compared to can satisfy your small amount of time to read it because pretty much everything time you only find book that need more time to be go through. The Human Nervous System, Second Edition can be your answer because it can be read by you actually who have those short extra time problems.

**Charles Howell:**

Within this era which is the greater particular person or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple strategy to have that. What you have to do is just spending your time little but quite enough to experience a look at some books. One of several books in the top collection in your reading list is actually The Human Nervous System, Second Edition. This book that is qualified as The Hungry Hillside can get you closer in becoming precious person. By looking right up and review this e-book you can get many advantages.
