The Network Challenge: Strategy, Profit, and Risk in an Interlinked World

By Paul R. Kleindorfer, Yoram (Jerry) Wind, Robert E. Gunther

Networks and the Enterprise: Breakthrough Thinking and Actionable Strategies

“This book presents an amazing collection of insights on underlying forces and ways to thrive in our post-Coaseian age—an age in which the centralized firm is changing into an agile and resilient network of participants. A must read for a world where unpredictability reigns supreme.”

—John Seely Brown, Independent Co-Chair of the Deloitte Center for Edge Innovation, and Senior Fellow at the Annenberg Center for Communication at the University of Southern California

“I couldn’t wait to get my hands on this research...I have already begun to put the ideas into practice in designing next-generation open innovation networks...the diversity of ideas and perspectives is truly amazing and will be a terrific resource to anyone seeking to move to new business models based on the power of networks for innovation, marketing, and creating and leveraging big ideas. Job well done!”

—Larry Huston, Creator of the “Connect and Develop” program for Procter & Gamble, and Managing Director of 4iNNO, a major Open Innovation consulting practice

“In our borderless world, every manager needs to understand the strategic implications of networks. For the first time, *The Network Challenge* brings together thought leaders from many fields—a team of experts as broad as the network challenge itself.”

—Kenichi Ohmae, author of more than 100 books, including the seminal work, *The Mind of the Strategist*, advisor on global strategy to foreign governments and scores of multinational corporations, selected by *The Economist* as one of five management gurus in the world.

Networks define modern business. Networks introduce new risks (as seen by the rapid spread of contagion in global financial markets) and opportunities (as seen

in the rapid rise of network-based businesses).

While managers typically view business through the lens of a single firm, this book challenges readers to take a broader view of their enterprises and opportunities.

This book's 28 original essays include

CK Prahalad on networks as the new locus of competitive advantage

Russell E. Palmer on leadership in a networked global environment

Dawn Iacobucci and **James M. Salter II** on the business implications of social networking

Franklin Allen and **Ana Babus** on contagion in financial markets

Steven O. Kimbrough on artificial intelligence, evolutionary computation, and networks

Satish Nambisan and **Mohan Sawhney** on tapping the "global brain" for innovation

Manuel E. Sosa on coordination networks in product development

Christophe Van den Bulte and **Stefan Wuyts** on customer networks

Christoph Zott and **Raphael Amit** on using business models to drive network-based strategies

Yoram (Jerry) Wind, **Victor Fung**, and **William Fung** on network orchestration

Valery Yakubovich and **Ryan Burg** on network-based HR strategy

Howard Kunreuther on risk management strategies for an interdependent world

Paul R. Kleindorfer and **Ilias D. Visvikis** on integrating financial and physical networks in global logistics

Witold J. Henisz on network-based political and social risk management

Boaz Ganor on terrorism networks

And much more...

Editorial Review

Review

“We’re entering an age of networked intelligence. *The Network Challenge* marshals a cast of savvy thinkers and practitioners to tackle a broad range of the fascinating and important unanswered questions. Completely stimulating.”

--Don Tapscott, author of 13 books about networks in business and society, including *Wikinomics* and most recently, *Grown Up Digital*.

From the Back Cover

Networks define modern business. Networks introduce new risks, as can be seen by the rapid spread of contagion in global financial markets, and opportunities, as seen in the rapid rise of network-based businesses. While managers typically view business through the lens of a single firm, this book challenges readers to take a broader view of their enterprises and opportunities.

In this book, more than 50 leading thinkers in business and many other disciplines take on the challenge of understanding, managing, and leveraging networks. This book offers deep knowledge of networks drawn from decades of research by one of the broadest groups of experts ever assembled to consider this topic. It provides actionable new insights into many facets of the network challenge, from supply chains to social networks, leadership to strategy, risk management to HR, terrorism to infectious disease. This book won't just transform the way you think about networks: It will transform the way you *build, use, and profit from them*.

About the Author

Paul R. Kleindorfer is the Paul Dubrue Professor of Sustainable Development and Distinguished Research Professor at INSEAD, Fontainebleau, and the Anheuser Busch Professor of Management Science (Emeritus) at the Wharton School of the University of Pennsylvania. Dr. Kleindorfer graduated with distinction from the U. S. Naval Academy in 1961. He studied on a Fulbright Fellowship in Mathematics at the University of Tübingen, Germany (1964/65), followed by doctoral studies in the Graduate School of Industrial Administration at Carnegie Mellon University (PhD, 1970). Before joining INSEAD in 2006, Dr. Kleindorfer held university appointments at Carnegie Mellon University (1968/9), Massachusetts Institute of Technology (1969/72), and The Wharton School (1973—2006). Dr. Kleindorfer's research has focused on risk management, ranging from major accident prevention to hedging and trading to mitigate supply and demand coordination risks. His current research is on sustainable operations for energy-intensive companies and carbon-leveraged investments arising from legislation and regulations to mitigate presumed consequences of industrial activity on the biosphere and climate.

Yoram (Jerry) Wind is The Lauder Professor and Professor of Marketing at the Wharton School of the University of Pennsylvania. He joined the Wharton faculty in 1967, with a doctorate from Stanford University. He is founding director of The SEI Center for Advanced Studies in Management, the founding academic director of The Wharton Fellows Program, and was the founding editor of Wharton School Publishing. From 1995 to 1997 he led the development of the Wharton globalization strategy. Dr. Wind led the reinvention of the Wharton MBA curriculum (1991-93) and the creation of the Wharton Executive MBA Program (1974). Dr. Wind was founding director of the Joseph H. Lauder Institute (1983-1988) and the Wharton International Forum (1987). He has served in editorial positions for many top marketing journals. He has published more than 250 papers and articles and more than 20 books. Dr. Wind is a member of the advisory boards for various entrepreneurial ventures and a trustee of the Philadelphia Museum of Art. Dr. Wind's major marketing awards include The Buck Weaver Award (2007), The Charles Coolidge Parlin Award (1985), AMA/Irwin Distinguished Educator Award (1993), the Paul D. Converse Award (1996), and the Elsevier Science Distinguished Scholar Award of the Society of Marketing Advances (2003). Dr. Wind is the former Chancellor of the International Academy of Management. He is co-founder of the Interdisciplinary Center, Herzliya (IDC) and chair of its academic council and university appointment and promotion committee. He received a PhD from Stanford University.

Users Review

From reader reviews:

Bernard Woodley:

Reading a guide tends to be new life style with this era globalization. With studying you can get a lot of information that can give you benefit in your life. Having book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Many author can inspire all their reader with their story or their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors in this world always try to improve their skill in writing, they also doing some study before they write on their book. One of them is this The Network Challenge: Strategy, Profit, and Risk in an Interlinked World.

James Miguel:

It is possible to spend your free time to learn this book this book. This The Network Challenge: Strategy, Profit, and Risk in an Interlinked World is simple bringing you can read it in the area, in the beach, train and also soon. If you did not include much space to bring the actual printed book, you can buy typically the e-book. It is make you easier to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Tom Copper:

Beside this specific The Network Challenge: Strategy, Profit, and Risk in an Interlinked World in your phone, it could possibly give you a way to get more close to the new knowledge or information. The information and the knowledge you are going to got here is fresh in the oven so don't end up being worry if you feel like an aged people live in narrow community. It is good thing to have The Network Challenge: Strategy, Profit, and Risk in an Interlinked World because this book offers to you personally readable information. Do you often have book but you don't get what it's about. Oh come on, that wil happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. So do you still want to miss that? Find this book as well as read it from at this point!

Jessica Palmer:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person similar to reading or as studying become their hobby. You must know that reading is very important as well as book as to be the factor. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Amount types of books that can you decide to try be your object. One of them is The Network Challenge: Strategy, Profit, and Risk in an Interlinked World.
