## Editorial Review

From the Back Cover

*Ancient Civilizations* offers a comparative analysis of the field, including both old world and new civilizations, and explores the connections between all civilizations around the earth. The volume provides a jargon-free introduction to ancient civilizations from the first civilizations, and the great powers in the Near East, to the first Aegean civilizations, the Mediterranean world in the first millennium, Imperial Rome, northeast Africa, divine kings in southeast Asia, and empires in East Asia, as well as early states in the Americas and Andean civilization. For those interested in ancient civilizations.

About the Author

**Chris Scarre** is an archaeologist specializing in the prehistory of Europe and the Mediterranean, with a particular interest in the archaeology of Atlantic façade (Iberia, France, Britain, and Ireland). He took his MA and PhD at Cambridge, the latter a study of landscape change and archaeological sites in western France. He has participated in fieldwork projects in Britain, France, and Greece and has directed excavations at Neolithic settlement and mortuary sites in western France. His early work was published in *Ancient France*. He is currently Deputy Director of the McDonald Institute for Archaeological Research, University of Cambridge, and editor of the twice-yearly *Cambridge Archaeological Journal*. As a Fellow of Girton College, Cambridge, he teaches a wide range of archaeological subjects from early stone use in the Paleolithic to the expansion of the Roman Empire.

His research interests include the relationship of prehistoric monuments to their landscape setting, the use of color in prehistoric societies, and the development and character of early state societies. Recent papers have considered the meanings that prehistoric societies may have attached to natural landscape features in Brittany, and the manner in which those meanings were given material expression through the construction of burial mounds or settings of standing stones. The nature of early farming societies along the Atlantic façade in relation to theories of demographic displacement is reviewed in a number of articles published since 1992. His latest field project is the excavation (together with French colleagues) of a prehistoric burial mound at Prissé-la-Charrière in western France.

As Deputy Director of the McDonald Institute he is involved with the wider research programs of the Institute that include field projects in Europe and the Middle East and laboratories specializing in the analysis of faunal and botanical remains.

**Brian Fagan** is one of the leading archaeological writers in the world and an internationally recognized authority on world prehistory. He studied archaeology and anthropology at Pembroke College, Cambridge University, and then spent seven years in sub-Saharan Africa working in museums and in monument conservation and excavating early farming sites in Zambia and East Africa. He was one of the pioneers of multidisciplinary African history in the 1960s. From 1967 to 2003, he was Professor of Anthropology at the University of California, Santa Barbara, where he specialized in lecturing and writing about archaeology to wide audiences. He is now Emeritus.

Professor Fagan has written six best-selling textbooks apart from this book: *Ancient Lives: An Introduction to Archaeology*; *In the Beginning*; *Archaeology: A Brief Introduction*; *People of the Earth*; *World Prehistory*, all published by Prentice Hall—that are used around the world. His general books include *The Rape of the Nile*, a classic history of Egyptology; *The Adventure of Archaeology*; *Time Detectives*; *Ancient North America*; *The Little Ice Age*, *The Long Summer*, and *Fish on Friday*. He is General

Editor of the Oxford Companion to Archaeology. In addition, he has published several scholarly monographs on African archaeology and numerous specialized articles in national and international journals. He is also an expert on multimedia teaching and has received the Society for American Archaeology's first Public Education Award for his indefatigable efforts on behalf of archaeology and education.

Brian Fagan's other interests include bicycling, sailing, kayaking, and good food. He is married and lives in Santa Barbara with his wife and daughter, four cats (who supervise his writing), and, last but not least, seven rabbits.

## **Users Review**

### **From reader reviews:**

#### **Mary McKay:**

This Ancient Civilizations book is not really ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this publication incredible fresh, you will get facts which is getting deeper you read a lot of information you will get. That Ancient Civilizations without we recognize teach the one who reading it become critical in considering and analyzing. Don't become worry Ancient Civilizations can bring when you are and not make your carrier space or bookshelves' turn out to be full because you can have it with your lovely laptop even cellphone. This Ancient Civilizations having very good arrangement in word in addition to layout, so you will not really feel uninterested in reading.

#### **Austin Lawrence:**
