**Chemical Composition of Everyday Products** By John Toedt, Darrell Koza, Kathleen Van Cleef-Toedt

Chemicals, both helpful and harmful, affect our everyday lives. From cosmetics to medications to cleansers to lighting, automotive, and office products, each is composed of a complex blending of elements to perform a specific task. This book analyzes over 100 groups of products, identifying the specific chemical composition of a product, its historical use, how it functions, and any associated environmental and/or human health issues. Ten laboratory exercises provide students with the opportunity to observe these chemicals in action. Readers will learn which chemical elements are in everyday products and how they may affect health and environment, assisting them in making educated choices as consumers.

## **Editorial Review**

### **Review**

"[W]ide-ranging in scope, dealing with over 100 groups of products from health and medical to those associated with lighting and cleaning products to those described as 'lawn products'....[t]his book could usefully provide snippets of information to enliven lessons." - **School Science Review**

"Both high school and college collections strong in chemistry will want to add this helpful analysis to their collection: over 100 groups of products receive attention to not only chemical composition, but historic product use, functions, and related issues. Ten lab exercises provide students with observation keys, making *Chemical Composition of Everyday Products* the perfect supplemental text for introductory chemistry courses. Easy to access and understand, relating to everyday materials from soap and cosmetics to baby products what more could one wish for?" - **MBR Bookwatch**
